

Flipkart Laptop Web Scraping

Objective

This project demonstrates how to scrape laptop information from the **Flipkart** website using **Python**, **Selenium**, and **WebDriver Manager**. The extracted information includes product title, price, and image URL.

🔧 Technologies Used

-  Python
-  Selenium
-  Chrome WebDriver
-  Pandas

```
In [1]: from selenium import webdriver
        from selenium.webdriver.common.by import By
        from selenium.webdriver.chrome.service import Service
        from webdriver_manager.chrome import ChromeDriverManager
        import pandas as pd
        import time
```

```
In [2]: driver = webdriver.Chrome(service=Service(ChromeDriverManager().install()))

        driver.get("https://www.flipkart.com/search?q=laptop")

        time.sleep(8)
```

```
In [3]: products = driver.find_elements(By.XPATH, "//div[@data-id]")
```

```
print("Total Products Found:", len(products))
```

Total Products Found: 24

In [4]: data = []

```
for product in products:

    try:
        title = product.find_element(By.CLASS_NAME, "RG5S1k").text
    except:
        title = "N/A"

    try:
        price = product.find_element(By.CLASS_NAME, "hZ3P6w").text
    except:
        price = "N/A"

    try:
        image = product.find_element(By.CLASS_NAME, "UCc11I").get_attribute("src")
    except:
        image = ""

    data.append({
        "Title": title,
        "Price": price,
        "Image": image
    })
```

In [5]: df = pd.DataFrame(data)

```
df.head()
```

Out[5]:

```
In [7]: df.to_csv("flipkart_laptops.csv", index=False)

print("CSV File Saved Successfully.")
```

CSV File Saved Successfully.

```
In [8]: driver.quit()
```

Conclusion

Successfully scraped laptop information from the **Flipkart** website using Selenium automation.

- 🖥️ Laptop Title
- 💰 Price
- 🖼️ Product Image URL

The extracted data was stored in a **Pandas DataFrame** and exported as a **CSV file** for further analysis.

Dynamic Web Scraping Completed Successfully!
