

💬 Quotes Web Scraping using Selenium

🎯 Objective

This project demonstrates how to scrape inspirational quotes from the **Quotes To Scrape (JavaScript)** website using **Python**, **Selenium**, and **Chrome WebDriver**. The scraper extracts quote text and author names from multiple pages.

🔧 Technologies Used

- 🐍 Python
- 🌐 Selenium
- 🚗 Chrome WebDriver
- 📊 Pandas

```
In [1]: from selenium import webdriver
from selenium.webdriver.common.by import By
from selenium.webdriver.chrome.service import Service
from webdriver_manager.chrome import ChromeDriverManager

import pandas as pd
import time
```

```
In [2]: driver = webdriver.Chrome(service=Service(ChromeDriverManager().install()))

url = "https://quotes.toscrape.com/js/"

driver.get(url)

time.sleep(5)
```

```
In [3]: quotes = []
```

```
In [ ]: for i in range(3):

    cards = driver.find_elements(By.CLASS_NAME, "quote")

    for c in cards:

        try:
            text = c.find_element(By.CLASS_NAME, "text").text

            author = c.find_element(By.CLASS_NAME, "author").text

            quotes.append({
                "Quote": text,
                "Author": author
            })

        except:
            pass

    try:
        next_btn = driver.find_element(By.CSS_SELECTOR, "li.next a")
        next_btn.click()
        time.sleep(3)

    except:
        break
```

```
In [5]: df = pd.DataFrame(quotes)

df.head()
```

Out[5]:

	Quote	Author

```
In [7]: df.to_csv("quotes_data.csv", index=False)

print("CSV File Saved Successfully.")
```

CSV File Saved Successfully.

```
In [8]: driver.quit()
```

Conclusion

Successfully scraped inspirational quotes from the **Quotes To Scrape (JavaScript)** website using Selenium.

- 🗨️ Quote Text
- 📄 Author Name
- 📄 Multiple Pages Scraped

The extracted data was stored in a **Pandas DataFrame** and exported as a **CSV file** for future analysis and

reference.

Dynamic Web Scraping Completed Successfully!
